

Company Overview

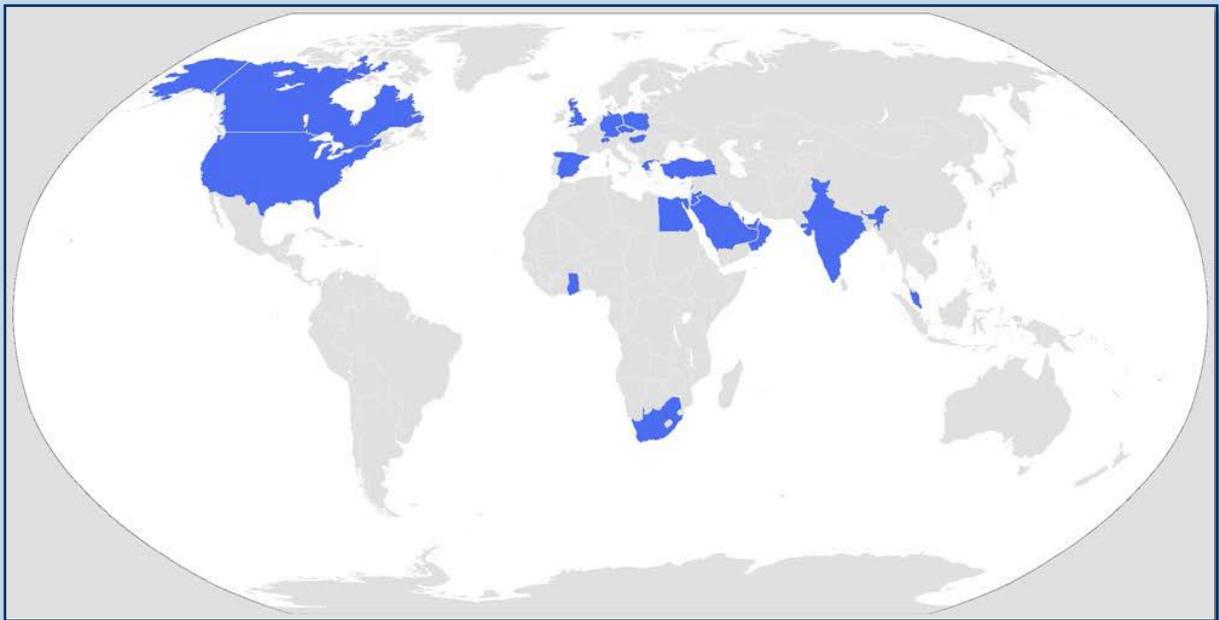

About Us

NeuralTechSoft is a leading consulting and training firm that specializes in risk management, treasury management, regulatory compliance and policy development and review for financial institutions.

Since 2003 our consultants have helped banks and financial institutions in over 25 countries with our cutting edge risk management solutions and analytical expertise. Our results reflect the extensive experience of our core team in the field of banking and finance as well as our proficiency with the complex mathematics underlying modern finance. Our proprietary solutions combine the latest research in finance with advanced computing techniques.

The corporate education and training arm of NeuralTechSoft has delivered more than 300 courses in over 30 countries in the Middle-east, South Asia, Africa and Europe. We specialize in courses for banks and financial institutions designed for bank executives at all levels from management associate to senior management. Our trainers are experienced bankers and accomplished academicians who have delivered hundreds of similar courses over the years.

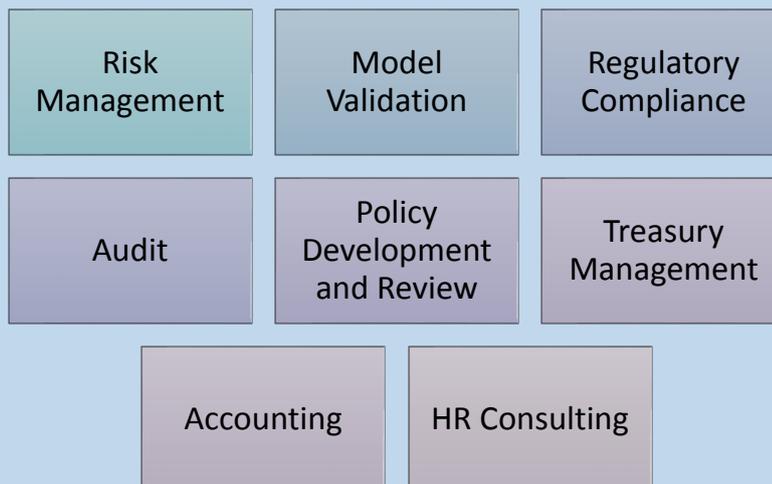

Our Global Presence

Our Products & Services

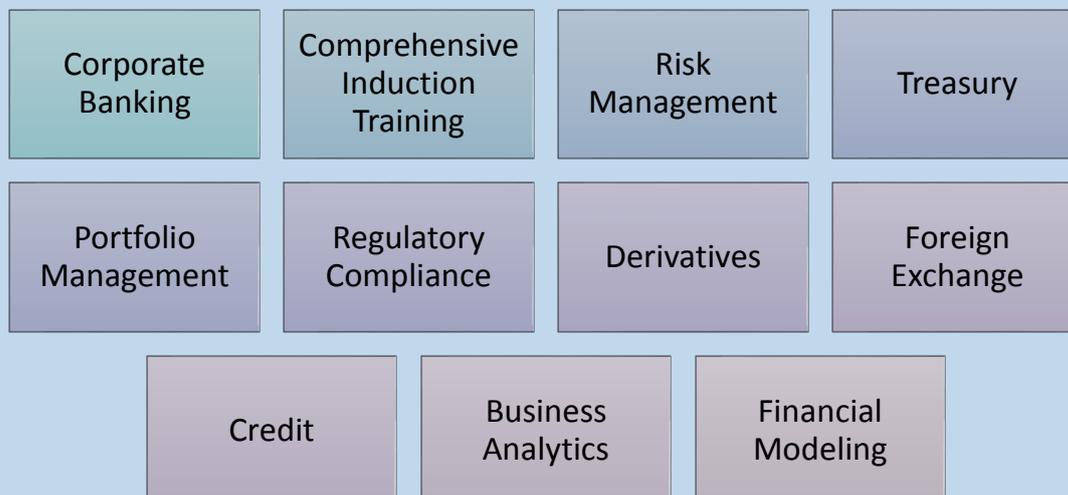

Consulting

Our team of experts can provide your organisation with end-to-end and effective consultancy solutions, which would increase the operational efficiency as well as reduce risks of your financial institution. These range across a myriad of fields:

Training

NeuralTechSoft is a leading institution for providing training services in the Banking, Financial Services and Insurance (BFSI) industry. We can customize our courses in accordance with the requirements and specifications of your organisation. The course syllabus varies from:

Trading

Power computers that follow complex algorithms to analyze multiple markets and execute trades based on market conditions carry out High Frequency Trading. Specialized financial institutions develop proprietary algorithms and execute orders on the same. NeuralTechSoft helps such clients by providing expert guidance in setting up proprietary desks as well as assisting them in:

Back Testing

Checking for
Robustness

Model
Validation

Scenario
Analysis

Stress
Testing

R/ R Metrics

NeuralTechSoft is affiliated to Rmetrics.org; a non-profit initiative, based out of Europe, headquartered in Zurich. We, as a financial consulting firm, recognize the potential of R in the business world and have collaborated with Rmetrics to introduce Rmetricsasia.org, based in Mumbai. We support training and consulting regarding R to professionals as well as the academic universe.

Bourse Game

The Bourse Game is a unique Foreign Exchange trading simulation platform developed by NeuralTechSoft, which provides an acutely realistic simulation of the foreign exchange market for practical hands-on training. Our Bourse Game package is bundled with a customizable training programme, delivered by an eminent faculty, who have extensive experience in banking and training.

Clients

Our consulting services have benefitted clients in Asia, Africa and Europe. While banking and financial services are our domain of expertise we have also devised solutions for clients in other industries like telecom, manufacturing, insurance etc. Our consultants are experienced and well-equipped at working in diverse geographies and industries and well-versed with the legal and regulatory frameworks, industrial environment and work culture of our client markets.
